# CEDR Symposium Road Traffic Noise: deliverables

The image displays four overlapping technical report covers from CEDR, each featuring the organization's logo and name. The reports are:

- Technical Report 2017-03:** "State of the art in managing road traffic noise: cost-benefit analysis and cost-effectiveness analysis". The cover image shows a road with a group of people standing on the shoulder. The date "Janua" is partially visible at the bottom.
- Technical Report 2017-02:** "State of the art in managing road traffic noise: noise barriers". The cover image shows a highway with noise barriers. The date "Janua" is partially visible at the bottom.
- Technical Report 2017-01:** "State of the art in managing road traffic noise: noise-reducing pavements". The cover image shows a close-up of a truck on a road. The date "Janu" is partially visible at the bottom.
- Summary Report:** "State of the art in managing road traffic noise: summary report". The cover image shows a rural landscape with a road and sheep. The date "April 2017" is visible at the bottom.

Copenhagen, 15-16 May 2017

# **CEDR Symposium Road Traffic Noise: objectives**

---

- disseminate key findings and recommendations
- provide new ideas and tools for CEDR NRAs
- identify key issues and potential research topics

# **CEDR Symposium Road Traffic Noise: CEDR Call 2018 Environment**

---

- feedback on road traffic noise topics
- topics range basic descriptions to detailed proposals
- use green/red stickers and yellow Post-its
