CEDR-ORGANISED INVITED SESSION (in cooperation with EC)

08:30 [Beyond R&I Grants – From Research to Implementation](#)

Location: *Strauss 1-3*

This Session attempts to answer this question by considering two European research funding programmes which have distinctive but complementary goals – and both try to identify what framework can enable maximum implementation and deployment of research results.

Horizon 2020 supports R&I projects which contribute to the major EU policy priorities. The CEDR Transnational Research Programme responds to the specific needs of European road administrations and seeks to provide an effective framework for individual road authorities to operationalise research results on their own networks.

Together, both programmes are vital for supporting the development of a transport network that is safer, more efficient and more sustainable. By considering their shared challenges, this Session will identify possible steps to ensure a seamless transfer from research funding to innovation to implementation and deployment of results.
